

Ergoapt Compact Wireless Keyboard

A wireless, ergonomic keyboard with full sized keys an aluminum case and rechargeable battery.

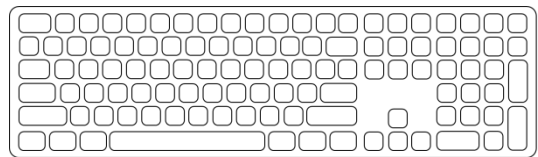

The benefits of compact

Without a numeric keypad, compact keyboards are narrower. The compact size allows for a more relaxed, natural and centered working position by reducing the distance required to reach for the mouse.

Compact sized keyboard with mouse

Full sized keyboard with mouse

Low profile, low strain

The Ergoapt Compact Keyboard has a low profile design, this height allows for a neutral and more natural wrist position. The keyboard features scissor switch keys that require a low activation force and deliver a crisp, tactile feel that reduces the effort required to type.

Function within a compact form

This compact keyboard features full size alphanumeric keys and keys with dual functions that allow for additional features that appear on full size keyboards. The Function Key allows for these functions to activate.

Ergoapt Compact Wireless Keyboard

Convenient Hot Keys

The Ergoapt Compact Keyboard has 12 hot keys that provide easy access for popular functions and reduce the need to reach for the mouse.

Sturdy and sleek

The entire case of the Ergoapt Compact Keyboard is made of aluminium. This construction provides a solid feel, additional weight and removes case flex.

Wireless connection

The keyboard connects wireless via a 2.4GHz USB receiver with a range of 10 meters.
