

# ezee<sup>™</sup> copy

## Instructions for use

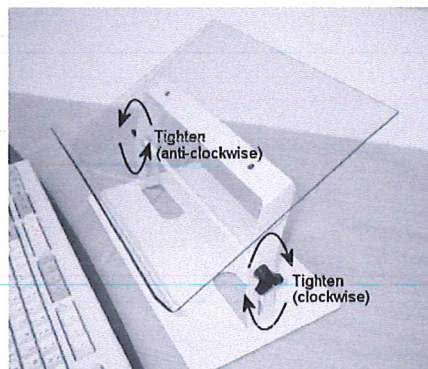

Thank you for purchasing an Ezee Copy document holder. Please follow these instructions carefully to gain the maximum benefit.

The Ezee copy is a line of sight document holder which means that the product should preferably be placed between your computer monitor and your keyboard.

- 1) Place the Ezee Copy in the desired location ensuring that the pallet is free from any weight such as books or heavy documents.

- 2) Loosen both tri-shaped handwheels so that the pallet can move freely through any height and angle position on the mechanism. The handwheels tighten and loosen in opposite directions to improve the locking mechanism (anti-clockwise and clockwise when viewed from the side) - see below

- 3) Use both hands to locate the correct height and angle for the Ezee Copy and then tighten the handwheels to lock the pallet in place.
