

# RollerMouse Mobile

## Ergonomics on the Go

The newest member of the RollerMouse family, the RollerMouse Mobile brings you all the of the ergonomic benefits you would expect from a RollerMouse combined with a compact design meant for working away from the office. RollerMouse Mobile is our most compact RollerMouse and provides unparalleled ergonomic benefits compared to a standard handheld mouse.

No matter if you're working on a plane, from a hotel, or sitting at your kitchen table, RollerMouse Mobile will make you more comfortable while reducing the risk of developing an ergonomic injury.

Taking design cues from the RollerMouse Red, the Mobile has been crafted to be a compact, ergonomic RollerMouse for users who are working remotely or on-the-go.

Designed to fit impeccably with a compact/mini keyboard and most laptops, the RollerMouse Mobile is the perfect ergonomic companion for remote and mobile professionals.

## Product code

**RM-MOBILE**

## Be Centred

The RollerMouse Mobile is designed to sit directly in front of you allowing you to stay in a neutral posture and work ambidextrously. This posture promotes comfort, reduced strain, and the ability to eliminate fatigue associated with heavy computer use.

## Made to Move

The RollerMouse Mobile is the most compact RollerMouse yet. Weighing 270g and coming in at 305mm in width, it is the perfect on-the-go ergonomic device for those who work on the go. RollerMouse Mobile combines portability with all the ergonomic benefits that are a part of every RollerMouse device.

## Control at Your Fingertips

All RollerMouse products rely on the patented Rollerbar to control the cursor on your screen. This new way of cursor control will allow you to work fluidly with your fingers and thumbs and is easily used ambidextrously. The Rollerbar doesn't require the gripping and squeezing of a handheld mouse, increasing your comfort, and reducing the risk of developing a mouse-related injury.
